Highly passionate Fullstack Web Developer with a knack for design and UI as well who really found his new home in coding. Works **very professional, learns very fast** and is armed with **detail-orientated** workflow paired with love for **clean code**. These skills enable a successful work through the **CareerFoundry Fullstack Web Developer Course** with great <u>output</u>. Has leading experience from the former job and therefore lived the principles of **communication, teamwork, feedback, motivation and dealing with mistakes** for best employee satisfaction and results. At least having a curiosity for Data Science.

References

Panagiota Mitsopoulou (Software Developer, Personal Mentor @ CareerFoundry Fullstack Web Developer Course)**:**

"*I had the pleasure to be Günther's mentor at Careerfoundry's Full-stack Web Development course! Günther combines everything a future employee could even dream of and even more. Where should I start from? His professionalism, fast learning, fast deliverables with high quality, organizational & project management skills, communication skills, team work just to name a few of them. Günther is an exceptional student who is very smart with high emotional intelligence. Not only does he deliver his tasks super fast, but he helps rest students, shares useful resources and asks for feedback and best practises. He is the fastest student among all students who participate in this course! What is really impressive is the fact that he combines clean code with a love for design and nice UI as well. So talented! He will be a valuable asset to any team, guarantee :-)*"
